Contents of Vol. 156

ELECTRONICS AND OPTICS

Correlation between morphology, optical losses and laser damage of MgF_2–SiO_2 multilayers . . . 1
E. Welsch, H. G. Walther (Jena, G.D.R.), D. Schäfer (Berlin, G.D.R.), R. Wolf (Mittweida, G.D.R.) and H. Müller (Jena, G.D.R.)

Reflectometry measurement of optical parameters of $Au/SiO_2/Si$ films 11
L. S. Miller, A. J. Walder, P. Linsell and A. Blundell (Coventry, U.K.)

Interpretation of attenuated total reflection changes induced by a submonolayer of caesium adatoms on silver films 21
J. C. Dudek (Paris, France)

A comparison of second harmonic generation and electro-optic studies of Langmuir–Blodgett monolayers of new hemicyanine dyes. 39
G. H. Cross, I. R. Peterson, I. R. Girling, N. A. Cade (Wembley, U.K.), M. J. Goodwin, N. Carr, R. S. Sethi (Towcester, U.K.), R. Marsden, G. W. Gray, D. Lacey, A. M. McRoberts, R. M. Scrowston and K. J. Toyne (Hull, U.K.)

METALLURGICAL AND PROTECTIVE COATINGS

Structure of TiN coatings deposited at relatively high rates and low temperatures by magnetron sputtering 53
V. Valvoda, R. Kužel, Jr., R. Černý and J. Musil (Prague, Czechoslovakia)

PREPARATION AND CHARACTERIZATION

The interaction of copper and nickel: nickel monolayers on a Cu{100} single crystal 65
M. A. Morris, P. R. Webber (London, U.K.) and Z. G. Zhang (Beijing, China)

A comparative study of silicon deposition from $SiCl_4$ in cold plasma using argon, H_2 or $Ar+H_2$ . . 79
R. R. Manory, U. Carmi, R. Avni and A. Grill (Beer Sheva, Israel)

Black nickel–cobalt: selective coatings prepared by a conversion process 93
N. C. Mehra and S. K. Sharma (New Delhi, India)

Kinetics and mechanism of reaction at room temperature in thin Au/metal couples 105
Ž. Marinković and V. Simić (Belgrade, Yugoslavia)

Nitrogen migration and nitride formation during low temperature reactive annealing of titanium . 117
M. Erola (Helsinki, Finland)

Long-time air oxidation and oxide–substrate reactions on GaSb, GaAs and GaP at room temperature studied by X-ray photoelectron spectroscopy 127
Y. Mizokawa, O. Komoda and S. Miyase (Osaka, Japan)

Formation of InSe and GaSe deposited films and their electrical properties. 145
M. Yudasaka and K. Nakanishi (Yokohama, Japan)

Electric-field-assisted deposition of optical coatings 153
P. F. Gu (Hangzhou, China)

Effects of oxygen partial pressure on the properties of reactively evaporated thin films of indium oxide 161
S. Naseem, I. A. Rauf, K. Hussain and N. A. Malik (Lahore, Pakistan)

GENERAL FILM BEHAVIOUR

Ion beam suppression of hillock growth in aluminium thin films 173
N. Peacock (Ipswich, U.K.)

ELECTRONICS AND OPTICS

Simple method of spectroscopic reflectometry for the complete optical analysis of weakly absorbing thin films: application to silicon films 181
I. Ohlídal and K. Navrátil (Brno, Czechoslovakia)

Thermoelectric effects in thin films and wires. 191
L. A. Moraga (Santiago, Chile)

Capacitance–voltage properties of thin Ta_2O_5 films on silicon 207
G. S. Oehrlein (Yorktown Heights, NY, U.S.A.)

METALLURGICAL AND PROTECTIVE COATINGS

The effect of stoichiometry on sputtering, deuterium retention and surface damage in titanium carbide films 231
M. Kitajima, T. Noda and M. Okada (Ibaraki, Japan)

PREPARATION AND CHARACTERIZATION

Annealing behaviour of extremely low energy beryllium implantation into $Ga_{0.47}In_{0.53}As$ 239
G. Fernholz, U. Breuer and H. Beneking (Aachen, F.R.G.)

High pressure oxidation of Si(100) for production of ultrathin oxide metal–insulator–semiconductor diodes. 243
N. Basu and K. N. Bhat (Madras, India)

Gas phase aluminide coatings on nickel-base superalloy IN 713. 259
H. J. Lin, W. P. Sun and M. H. Hon (Tainan, Taiwan)

Inert gas entrapment in films produced by ion-assisted physical vapour deposition processes . . . 265
G. I. Grigorov and I. N. Martev (Sofia, Bulgaria)

Vapor-deposited superconducting lanthanum sulfide films. 271
D. D. Berkley, J. H. Kang, J. Maps, J.-C. Wan and A. M. Goldman (Minneapolis, MN, U.S.A.)

Characterization of microcrystalline silicon films prepared by the glow discharge method under different deposition conditions 277
S. Ray, S. C. De and A. K. Barua (Calcutta, India)

Deposition of TiB_2 films by a co-sputtering method 287
T. Shikama, Y. Sakai, M. Fukutomi and M. Okada (Ibaraki, Japan)

IR ellipsometry study of oriented molecular monolayers 295
R. Benferhat, B. Drévillon (Palaiseau, France) and P. Robin (Orsay, France)

Structure of reactively sputtered chromium–carbon films 307
S. K. Sharma (New Delhi, India) and J. P. Morlevat (Grenoble, France)

Electrochemical method to evaluate the connected porosity in ceramic coatings 315
Y. Arata, A. Ohmori and C.-J. Li (Osaka, Japan)

Organometallic chemical vapor phase deposition of "Mn_2Si" 327
G. T. Stauf, P. A. Dowben (Syracuse, NY, U.S.A.), N. M. Boag (Salford, U.K.), L. Morales de la Garza (Baja California, Mexico) and S. L. Dowben (Ithaca, NY, U.S.A.)

GENERAL FILM BEHAVIOUR

Non-uniform heating effects during treatment in a glow discharge 337
A. Marciniak (Warsaw, Poland)

Study of crystallization in amorphous tellurium films using resistivity measurements 345
K. Okuyama and Y. Kumagai (Yonezawa, Japan)

Silicide formation from ternary metal–metal–silicon systems 351
M. Setton and J. van der Spiegel (Philadelphia, PA, U.S.A.)

LETTERS

Isothermal desorption study of organic molecules in Langmuir–Blodgett films using attenuated total reflection L17
Z.-H. Wang, J.-B. Zheng, W.-C. Wang and Z.-M. Zhang (Shanghai, China)

Photoelectrical properties of H^+ implanted CdS thin films L21
L. Mahdjoubi, N. Hadj-Zoubir and M. Benmalek (Alger, Algeria)

New Langmuir–Blodgett films built up from a copper halogenide semiamphiphilic salt L27
M. Lequan and R. M. Lequan (Paris, France), M. Vandevyver, J. Richard, A. Barraud, M. Roulliay (Gif sur Yvette, France)

Patterned photoassisted organometallic deposition of iron, nickel and palladium on silicon L31
G. T. Stauf and P. A. Dowben (Syracuse, NY, U.S.A.)
